COURSE OVERVIEW

Differentiate Your Portfolio to Accelerate Growth – Eliminate fragmented, technical and tactical product positioning in favor of a cohesive value story for each vertical market segment. In this two-day **hands-on, how-to workshop**, you'll learn how to align your portfolio positioning to the strategic goals and priorities of your target customers in each market so that your marketing and sales dialogues consistently communicate strategic value. Tactical products and features are the proof points.

DAY 1 AGENDA

Day 1 Theme: Understand your target customers as well as they understand themselves so that you can consistently position solutions with strategic and quantifiable value to all levels of the customer organization!

- Advanced **market segmentation** techniques so that marketing and sales operate under a common definition of "target markets."
- **Organizational personas** that paint a picture of the customer organization from the top down so that all marketing and sales dialogues speak directly to the business goals and priorities that are strategic to your target customers.
 - You'll love the simple one-page format.
- **What do good business and market requirements look like?** They're a representation of WHAT your target customers are doing and WHY, without any regard to your products.
 - You get to be the customer and create strategic, operational and tactical business requirements from their perspective so that you have a "can't miss" target for your value messages.
- Create a **portfolio mission** that aligns marketing and sales to a common set of strategic customer goals and priorities.

At the end of day 1, you'll be able to answer the following questions:

1. **WHO** are our target customer (a common definition)?
2. **WHAT** are they trying to accomplish and **WHY**?
3. **WHAT's** stopping them & **WHY**?
4. **WHAT** are they doing about it?
5. **WHAT** metrics do they use to measure success?
6. **WHAT** solutions eliminate their biggest obstacles?

DAY 2 AGENDA

Day 2 Themes:

1. The most lucrative markets for the portfolio as a whole.
2. A marketing and sales strategy that maximizes near-term revenue from existing solutions.
 - **Advanced competitive analysis** that does away with the feature comparison matrices in favor of a layered approach that covers everything from competitor market strategies to user scenarios.
 - **Advanced portfolio analysis** that helps you identify your most lucrative short-term markets for the portfolio as a whole. The best revenue opportunities for each product may not be the most valuable for the customer, or your organization.
 - **Quantitative & qualitative market segment analysis** that identifies market segments with the greatest growth opportunities for new new name accounts and wallet share for the portfolio as a whole.
 - Create a **portfolio strategy** that prioritizes market segments and **business solutions** to maximize short-term revenue from existing solutions.
 - Create **strategic, operational and tactical** positioning for your market segments, solutions and products.
 - **Mobilize your value story** in marketing materials and sales tools to improve pipeline health and win rates.

At the end of this workshop, you'll know **HOW** to strategize objectively so that your marketing and sales initiatives accomplish three things:

1. Start more conversations with executive buyers and influencers.
2. Create a pipeline of buyers that are more qualified.
3. Differentiate the strategic value of your portfolio to improve win rates.

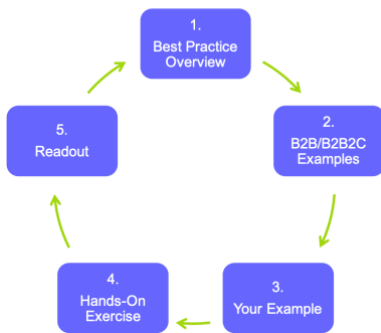

THE PROFICIENTZ DIFFERENCE

Deliver, Market & Sell Greater Strategic Value

Proficientz

Hands-On, How-To Training

You Won't Have to "Figure it Out" After the Training!

80% of every [instructor-led](#) and [online](#) training course consists of hands-on exercises and role-play scenarios that reflect your real-world. Hands on, how-to training for your products, your markets and your business model. You'll know exactly **what** to do and **how** to do it after the training because we'll do it together first in the classroom, real or virtual.

Stop Looking for Customer Problems!

Ultimately, your products are going to solve customer problems but building your product management & marketing discipline on a problem-based framework is risky. You can solve legitimate customer problems that have no strategic value to the customer organization.

Proficientz has developed the only [B2B product management framework](#) that cuts to the chase. You'll learn a can't miss approach that makes the **top-down business goals of your target customers** the focal point) of your product, marketing and sales functions. All you have to do is find and eliminate the biggest obstacles standing in their way and you'll never miss the mark.

No More Silos and Competing Priorities!

What's best for every product isn't always best for the customer. Proficientz offers the only framework that's designed specifically for managing, marketing and selling a B2B portfolio of business solutions.

Since most of your products target the same markets and customers, you'll learn how to use portfolio strategies to align all products to a common set of strategic goals and priorities of your target customers. That way, you can rest assured that your products are collectively delivering maximum market value.
